Vision & Mission

Our VISION is to be the first choice provider for value-added services that supported by multidiscipline engineer combined with effective and comprehensive training.

Our MISSION is to deliver cost-effective, high quality and reliable value-added services for any related matter revealed above.

Corporate Values

To Our Customer

We value our customers and will continue to value-add their business. We commit ourselves to actively improve our services.

To Our Employees

We recognize that all our people are important stake-holders of the company. We care for our people by creating a conducive work environment, helping them to their fullest potential and recognizing their contribu-tion.

To Industry and Society

We pledge to be a responsible corporate by acting professionally and ethically in all manners.

Our Services

Engineering, Procurement, Construction and Commissioning (EPCC)

We Provide End to End services, from Front End Engineering Design (FEED) and Detil Engineering Design (DED) to Commicioning and Maintenance Services.

To serve all clients, we have an expert team of many specialist engineers such as Civil, Mechanical, Piping, Electrical, and Instrument with long-term experiences in this core business.

Our Team ensures to handle all pre-operational testing and commissioning phases. We aim to inspect and test plant components, ensuring facilities follow the project design. Through testing of plant systems with products ensures design performance is met.

Our commissioning services support the ramp up of the plant throughput to the design level. As the final step in project execu-tion, we understand the importance of completing the work quickly, and as such, we work diligently with detailed planning to provide our clients with a rapid ramp up.

Project Management Services

Acting as partners and advisors to our clients, we ensure the success of a project whilst minimizing its overall cost. By appropriately sub-dividing a project, the best equipment can be sourced from multiple suppliers using local and foreign services and fabrication to assure quality, cost, and schedule.

PT Globalindo Buana manages all phases of a project from initial concept through sourcing of finance, engineering design, equipment selection and procurement, project execution, commissioning, and operational assistance

Operational Service

A. Operational and Maintenance Services

Globalindo Buana brings partner services concentrating on effective project ramp-up, plant operations, and maintenance optimization. Our core objective is to create value by offering more innovative and efficient solutions to operating and maintenance issues, supporting our clients' focus on their core businesses. Our solutions, including technical, advanced automation, and production systems, are tailored to our client's expectations.

PT Globalindo Buana experts offer a broad range of knowledge and experience that will be applied to operational effectiveness, often to reduce the need for capital investments. Project close-out analyses show that GMS technologies and operations know-how can often deliver new revenue.

B. Process Upgrading and Modification

We are experts in modifying or upgrading the equipment to the client's needs. We ensure that all process equipment and facilities are correctly installed according to plan so that the unit can be operated safely again.

C. Feasibility Study

We give accurate output guarantees and the best investment calculations for our clients on our feasibility studies.

D. Well Intervention Services

We are committed to helping and adapting to our customer's needs by providing the best services. We are willing to solve any customer's problem or give alternate solutions to get more effective and economical solutions. We also promoted and prioritized local products or services in conjunction with the Indonesian government campaign.
