COMPANY PROFILE

www.globalbuana.com

PT Globalindo Buana

ONE TEAM • ONE SPIRIT • ONE VISION

About us

Company with a core business in providing integrated solutions, well services and high specialized supplies to various industries in Indonesia, especially in Oil and Gas Production Facilities, Refinery Plants, Power Plants, Cement Plants, Mining Industries, Airport and Aviation Facilities and Petrochemical Plants.

With over than 20 years of experiences, PT Globalindo Buana has fully committed to support our clients to meet their project goals by providing reliable, innovative and competitive .

Our collective problem-solving culture ensures that the companys resources are made available for all projects. A continuous technology transfer program ensures that our expertise is maintained and enchanced, as well as conforming to the norms for quality assurance, our internal quality and control procedures guarantee the delivery of successful, timely, and cost-effecttive projects.

ASPEKNAS

Vision & Mission

Our **VISION** is become a trusted, innovative, and sustainable solution provider in energy industry.

Our **MISSION** is

1. Build strong, transparent partnerships with others by consistently delivering reliable solutions for our value customer.

2. Dedicated to enabling our partners and customers to achieve their sustainability goals, through innovation, collaboration and continuous improvement.

3. Develop and implement cutting-edge technologies thatdrive efficiency and suistainability in energy production, distribution, and consumption.

Corporate Value

To Our Customer

We value our customers and will continue to value-add their business. We commit ourselves to actively improve our services.

To Our Employees

We recognize that all our people are important stake holders of the company. We care for our people by creating a conducive work environment, helping them to their fullest potential and recognizing their contribution.

To Industry and Society

We pledge to be a responsible corporate by acting professionally and ethically in all manners.

Our Service

Well Service

We are committed to helping and adapting to our customers needs by providing the best services. We are willing to solve any customers problem or give alternate solutions to get more effective and economical solutions. We also promoted and prioritized local products or services in conjunction with the Indonesian government campaign.

Here are the services that PT Globalindo Buana can provide :

1. **Well Testing Equipments**
2. **Bottom Hole Pressure & Temperature Survey**
3. **Slickline Equipment Fabrication & Maintenance**
4. **Down Hole Flow Control & Gas Lift Tools**
5. **Sand Management :**
   - **Hydrocyclone Desander Equipment**
   - **Dual Pot Sand Filter**
   - **Sand Detection Tools**

Our Service

Well Service

Hydrocyclone Desander

PT Globalindo Buana Hydrocyclone Desander is designed to eliminates sand and other solid particles from incoming high pressure well stream comprises a mixture of liquid and gas fluids. The Hydrocyclone Desander package system is designed with optimize design for high performance, high efficiency, easy to operate with highly standard of safety compromise to minimum maintenance, small footprint and easy to mobilize.

Slickline

Slickline unit features dual drums with a 20,000-feet capacity for various wire sizes. It is equipped with a 4-speed transmission gearbox, dual-piston disc brake system, and precision depth and tension measurement. The mechanical and hydraulic drive system ensures optimal control, with an optional electric encoder for digital measurement. A wire lubrication system is also included for enhanced performance.

Our Service

Engineering, Procurement, Construction (EPC) and Maintenance Services

PT Globalindo Buana Provide End to End services, from Front End Engineering Design (FEED) and Detail Engineering Design (DED) Procurement, Construction, Commisioning beside EPC project. We also handle to the maintenance services for all facilities. We have an expert team of many specialist engineers such as Civil, Mechanical, Piping, Electrical, and Instrument with long-term experiences in this core business to serve all clients.

Our commissioning services support the ramp up of the plant throughput to the design level. As the final step in project execution, we understand the importance of completing the work quickly, and as such, we work diligently with detailed planning to provide our clients with a rapid ramp up.

Project Management Services

Acting as partners and advisors to our clients, we ensure the success of a project whilst minimizing its overall cost. By appropriately subdividing a project, the best equipment can be sourced from multiple suppliers using local and foreign services and fabrication to assure quality, cost,and schedule.

PT Globalindo Buana manages all phases of a project from initial concept through sourcing of finance, engineering design, equipment selection and procurement, project execution, commissioning, and operational assistance.

Operational Service

PT Globalindo Buana brings partner services concentrating on effective project ramp-up, plant operations, and maintenance optimization. Our core objective is to create value by offering more innovative and efficient solutions to operating and maintenance issues, supporting our clients focus on their core business. Our solutions, including technical, advanced automation, and production systems, are tailored to our client's expectations.

Our Products

PT Globalindo Buana provides high-quality products designed to meet field demands. With top-notch innovation and excellence, each of our products is ready to deliver a better experience and more effective solutions.

We offer a wide range of industrial and construction tools with high-quality standards to ensure efficiency, safety, and durability in every task.

Gas Lift Pack Off (GLPO)

Gas lift Pack off is a method to create the gas lift passage from the well annulus in to the tubing flow area at a desire location. The GLPO method would be preferred due to its simple completion and lower project cost then tubing recompletion using RIG or Hydraulic work over.

Retrievable Bridge Plug (RBP)

The retrievable bridge plug is mechanically set and pulled lock that can be used as a plug or suspended flow control devices in well. It is designed to set in a specific tubing size and hold pressure from both directions.

Permanent Bridge Plug (PBP)

PBP (Permanent Bridge Plug) is high pressure plug that constructed with cast iron. It can be set on E-line using GS Setting Kit or coil tubing using GS Hydraulic setting tool When set, opposing slips are located above and below rubber elements. The elements are contained backup ring to eliminate extrusion of the element at high pressure and temperature.

Our Products

Customized Various Downhole Tools

We can provide customized downhole tools such as fishing tools, packers, orifices, and others. Everything we provide has been proven to work well.

Panels Design & Fabrication

Our Rental Equipment

Truck Mounted Crane 12 Ton (TMC)

The vehicle chassis that we use in this TMC unit is the UD Quester CWE 280 Truck. This truck has several advantages, including: Fuel efficient, Has an environmentally friendly PTO feature, Has a real-time fuel coach feature, Has a cabin specifically designed for operations in mining areas , etc. The type of crane used is the Sany SPK36080.

Steam Cleaner

The Sioux EN-150-H8-3000-XP for extremely harsh operating environments with electric design with an extra-strong industrial steel frame for removing oil, grease, mud, and paraffin in industries such as oil and gas, mining, and wastewater treatment.

Construction Equipment & Electrical & Instrument Testing Tools

Miller 500x

Experience List

Name Of Project	Year	Project's Owner
General Well Operations and Support Services	2025 - 2029	MEDCO General Services
Procurement of COO Conventional Mandrel and Gaslift	2025 - 2027	PT Pertamina EP Bunyu Field
Provison of Prolonged Downhole Monitoring	2025 - 2026	Jadestone Energy Lemang
Procurement of Conventional Mandrel and Gaslift	2024 - 2025	Pertamina EP Zona 10 Field Bunyu
Rental EMR PPS 28, 200°C	2024 - 2025	Halliburton Logging Services
Rental Complete Set PPS 71 Gauge	2024 - 2025	PT NPS Energy Indonesia
Provision of Well Testing Services	2024 - 2025	PT Halliburton Indonesia
Procurement of Well Transformer Equipment PT Riau Energy EMP	-	EMP Energi Riau
Providing Advanced Geomechanics Study Services, For PT Pertamina EP Exploitation Drilling Wells	2024 - 2027	PDSI
Provision of Gaslift Refurbishment and Maintenance Services Natuna	2024 - 2026	Medco Natuna
Provision of Cyclone Solid Removal Equipment Rental and Support Services	2024	Halliburton
Provision of Long Duration Memory Gauges	2022 - 2025	Jadestone
Slickline Services	2023 - 2025	PT Medco E&P Indonesia
Provision of Retrievable Pipeline Isolation Plug and Installations Service	2023	Mubadala Energy
Pre-FEEDin South Basekap and Sebanga	2022	PT Berca Engineering International
Provision of Well Testing Unit Services	2022	PT Odira Karang Agung
Desander Rental Tarakan Unit	2022	Medco E&P Tarakan
Call of Order HDPE Geomembrane Installation for Well Operations Support	2021 - 2023	PT Pertamina EP Aset 3
Provision of Cyclone Solid Removal Equipment Rental and Support Services	2021 - 2023	Petronas Carigali Ketapang III
Desander Rental for Block B Wells	2021 - 2023	Medco E&P Natuna Ltd
Provision of Slickline, SRO and Well Testing Meruap Field	2021	PT Samudra Energy BWP
General Well Operations Support Services	2020 - 2025	Medco (Grissik) Ltd

Engineering, Procurement, Construction (EPC) and Maintenance Services

Experience List

Name Of Project	Year	Project's Owner
Procurement of FCU Cabling Panels (Procurement of Data Center Building - 2 and Data Center Landscaping - 2 Bank Indonesia in the Karawang Area)	2025	PT Adhi Karya
HDPE geomembrane Coating Work For PT Pertamina EP Zone 7 Drilling Operations	2024 - 2027	PT Pertamina EP
Local Services for PHE-DR Check Point Project, Consisted of : Cloud , End Point, Email Security, Maestro	2024	Indopoleon
Procurement of LTC Battery MWD Packages A & B	2024 - 2027	PDSI
Procurements of Well Transformer Equipment	2024	PDSI
Procurements of Mud Cooler Petani	2024	PDSI
Gap Filler Remixer Machine Installations	2024	PT Hyundai Energy Indonesia
Instrument and Electrical Work of Air Separation Unit Project for PT Amman MIneral Industry	2023 - 2024	PT JGC Indonesia
Instrument and Electrical Work for Akatara Gas Processing Facilities and Sales Pipekine Project	2023 - 2024	PT JGC Indonesia
Mother Station CNG Facilities Grobogan Project (KSO with PT Aemco)	2023	PT Energasindo Heksa Karya
Supply of Electrical Materials for Water Treatment Injection Facilities Construction, Tanjung	2021	PT Pertamina EP
Upgrading Water Injection System Field Sukowati Services	2020 - 2023	PT Pertamina EP Asset 4
Upgrading BS II, BS V and BS VI Field Tanjung-Tanjung Waterflood Project	2020 - 2021	PT Pertamina EP
Electrical Equipment Maintanance Services	2019 - 2024	Medco (Grissik) Ltd
